# Refrigeration Ball Valves

## Innovative Refrigeration Products with High-Quality Performance

- Heavy-duty, full-port, bi-directional ball valves built to last with 900 PSIG maximum working pressure on sizes up to 7/8".
- Reduce service calls, refrigerant loss, and contamination with our cone-shaped 100% virgin Teflon seals and seats.
- Testing with 95% nitrogen and 5% hydrogen solution at 450 PSIG to detect and correct any leaks before the factory.
- No need to remove the cap during installation or service. Loosen the nut, turn 1/4 of the stem cap, and open the valve fully; close by turning 1/4 again. Tighten the nut and the job is complete.
- Joined together with a smooth and equal brazing process to prevent pinhole leaks.
- Internally equalized ball design.
- Compatible with CFC, HCFC, HFC, and HFO refrigerants and oils.
- Schrader valve inserted into ball valve body for durability.
- Rupture-proof encapsulated stem that is engineered from the bottom up.
- Our 2-year warranty proves confidence, along with every valve being proudly stamped with a serial number and cleanly packaged in a poly-bag to prevent contamination and malfunctions.

## Certifications and Approvals

- UL/cUL 207
- CE Approved
- CRN Approved
- RoHS Compliant

## Symbols

- MS** Male Side  
**FFS** Female Side
